Strengthening Sarawak's Position in Medical Tourism

OFFICIAL WELCOME MESSAGE

YB Dato Sri Haji Abdul Karim Rahman Hamzah

Minister of Tourism, Creative Industry and Performing Arts Sarawak

It gives me great pleasure to welcome all delegates, speakers, industry leaders, partners and visitors to the Borneo Global MediTourism Congress & Expo 2026 here in Kuching, Sarawak.

I am particularly pleased that BGMT is bringing together participants not only from our neighbouring countries within Borneo and ASEAN, but also from markets further afield, including the Middle East and North Africa (MENA) region and Africa. This growing international participation reflects the opportunities before us and the increasing interest in building new connections with Sarawak and the wider Borneo region.

BGMT comes at a timely moment for Sarawak. We are witnessing encouraging growth in health tourism, with more visitors choosing Sarawak for medical treatment while experiencing the hospitality, culture and natural beauty for which our State is known. As the global tourism landscape continues to evolve, travellers are increasingly seeking destinations that can offer not only memorable experiences but also trusted services that support their health and well-being.

In 2025, Sarawak welcomed more than 104,000 medical travellers, continuing the strong upward trend of recent years. This is an important indication of growing confidence in Sarawak's healthcare services and the potential for medical tourism to become an increasingly significant part of our visitor economy.

Medical tourism extends far beyond the hospital. A patient travelling for treatment is often accompanied by family members, creating opportunities for our hotels, airlines, restaurants, transport providers, tourism operators, wellness providers and many other businesses. This is where healthcare and tourism come together to create wider economic value for Sarawak.

Events such as BGMT are therefore important. By bringing healthcare, tourism, government, business, investment and regional partners together under one platform, we are creating greater awareness of what Sarawak can offer and opening doors to new markets and collaborations.

Our ambition should be to progressively establish Sarawak as a trusted destination where quality healthcare is complemented by genuine hospitality, culture, nature and memorable experiences. BGMT can play an important role in taking that message beyond our borders and positioning Sarawak within the growing regional and international medical tourism landscape.

I congratulate the organisers, partners and supporters for making BGMT 2026 possible. To all our international and Malaysian guests, I encourage you to take the opportunity to discover Sarawak our people, our cultures, our cuisine and the many experiences that make our State unique.

Welcome to Sarawak, and I wish everyone a successful and rewarding BGMT 2026.

BGMT 2026 • SARAWAK

Building Sarawak's Future in Medical Tourism

OFFICIAL WELCOME MESSAGE

YB Datuk Sebastian Ting Chiew Yew

Deputy Minister for Tourism, Creative Industry and Performing Arts Sarawak (Tourism)

It gives me great pleasure to welcome all delegates, healthcare professionals, industry leaders, investors, partners and international guests to the inaugural Borneo Global MediTourism Congress & Expo 2026 in Kuching, Sarawak.

Medical tourism presents a significant opportunity for Sarawak. With the growth of our healthcare infrastructure, increasing private-sector investment, expanding hospitality and tourism offerings, and improving connectivity, Sarawak is well positioned to develop as an emerging medical tourism destination in the region.

Events such as BGMT are important in bringing the healthcare, tourism, hospitality, investment, technology and connectivity sectors together to build a stronger and more integrated ecosystem. More importantly, they provide a platform for Sarawak to connect with international markets, showcase our capabilities and create meaningful partnerships.

We are especially encouraged by the growing number of healthcare travellers choosing Sarawak, reflecting increasing confidence in the quality and capabilities of our healthcare sector. With the continued development of our ecosystem and stronger regional connectivity, there is significant potential for this sector to grow further.

The presence of international delegates from across Asia and beyond is a testament to the importance of this inaugural platform. We are proud to host BGMT and to welcome the world to Sarawak.

I commend the organisers, partners and stakeholders for bringing this important initiative to life, and I look forward to BGMT becoming a significant platform for collaboration, investment and growth in medical tourism.

Welcome to Sarawak. Welcome to BGMT 2026.

Advancing Healthcare and Liveability for a Stronger Sarawak

OFFICIAL WELCOME MESSAGE

Datuk Michael Tiang Ming Tee

Deputy Minister of Public Health,
Housing and Local Government Sarawak

“

It is my pleasure to welcome all delegates, healthcare professionals, industry leaders, partners and guests to the Borneo Global MediTourism Congress & Expo 2026 in Kuching, Sarawak.

The growth of medical tourism presents an important opportunity for Sarawak, not only from an economic perspective, but also in strengthening the quality, accessibility and overall development of our healthcare ecosystem. As Sarawak continues to progress, our aspiration is to build communities with access to quality healthcare, supportive infrastructure and an environment that promotes health and well-being.

Medical tourism today extends beyond medical treatment alone. Patients increasingly consider the entire experience — from the quality and safety of healthcare services to accessibility, accommodation, hospitality and the environment in which they recover. Sarawak is well positioned to bring these elements together while offering the warmth, culture and hospitality for which our state is well known.

The Borneo Global MediTourism Congress & Expo 2026 provides a timely platform for healthcare providers, government agencies, industry partners, investors and other stakeholders to exchange knowledge, explore opportunities and build meaningful collaborations. Such partnerships are essential in developing a medical tourism ecosystem that is sustainable, patient-centred and internationally competitive.

I am particularly encouraged that this inaugural congress brings together stakeholders from Sarawak, Malaysia and the international community. The exchange of knowledge, experience and best practices will help strengthen our capabilities and open new opportunities for the future of healthcare and medical tourism in Sarawak.

I congratulate the organisers, partners, sponsors and all those involved in bringing this congress to fruition. I hope the discussions and connections established here will translate into meaningful partnerships and initiatives for the future.

To all our guests, I extend a warm welcome to Sarawak. I wish the Borneo Global MediTourism Congress & Expo 2026 every success and all delegates a productive and memorable experience.

BGMT 2026 • SARAWAK

Building Connections, Creating Opportunities Across Borneo

OFFICIAL WELCOME MESSAGE

Audry Wan Ullok

President of Sarawak Tourism Federation

“

It is my great pleasure to welcome all delegates, speakers, partners, exhibitors and visitors to the Borneo Global MediTourism Congress & Expo 2026.

What began as a vision to create a regional platform for medical tourism has grown into a gathering that brings together different industries, expertise and opportunities from across Borneo, Malaysia and the wider region.

This year, BGMT welcomes 51 participating companies, approximately 500 delegates and an anticipated 2,000 visitors. Importantly, our exhibitors and partners extend well beyond hospitals and healthcare providers. They represent a diverse ecosystem that includes medical and healthcare supplies, diagnostics, technology, tourism, hotels and hospitality, travel, wellness, education and other supporting industries that collectively contribute to the medical tourism journey.

This diversity reflects what BGMT is ultimately about connection. Medical tourism cannot grow through healthcare alone. It requires collaboration across industries, stronger regional partnerships and a shared commitment to creating opportunities that benefit patients, businesses and destinations.

For Sarawak and the wider Borneo region, BGMT provides an important platform to showcase our capabilities while strengthening connections with neighbouring markets and the international community. Through the congress, exhibition, business networking and industry engagement, we hope to encourage meaningful conversations that translate into partnerships and opportunities long after these two days.

On behalf of the Organising Committee, I extend my sincere appreciation to our government agencies, strategic partners, sponsors, exhibitors, speakers and everyone who has placed their confidence in BGMT 2026. My sincere appreciation goes out to Orbitel our co-organiser in making this a huge success today!

I encourage you to connect, exchange ideas, explore new possibilities and make the most of the opportunities before us.

Welcome to BGMT 2026, and welcome to Sarawak. Together, let us build connections that move Borneo forward.

A Shared Vision for Borneo's Medical Tourism Future

OFFICIAL WELCOME MESSAGE

**Hema Kandy, Gopalerkrishnan
Balakrishnan & Saiful Busfari**

Founding Directors, Borneo Global
MediTourism Congress & Expo

“

It is with immense pride and sincere gratitude that we welcome you to the Borneo Global MediTourism Congress & Expo (BGMT) 2026.

BGMT was founded upon a shared vision: to build a collaborative platform that brings together the people, expertise and opportunities needed to advance Borneo's medical tourism ecosystem. From the beginning, we believed that this region possesses the right combination of healthcare capabilities, strategic connectivity, cultural diversity and renowned hospitality to emerge as a trusted regional destination for healthcare.

Bringing this vision to life has been a collective journey. It has required the commitment of government agencies, healthcare providers, tourism stakeholders, industry partners and many dedicated individuals who share our belief in Borneo's potential.

BGMT 2026 brings together healthcare leaders, medical professionals, policymakers, tourism stakeholders, technology providers, investors and regional partners. It provides a platform for knowledge exchange, meaningful dialogue and the development of partnerships that can strengthen the healthcare and medical tourism landscape across Borneo.

At the heart of medical tourism is the patient. Behind every journey is an individual or family placing their trust in a healthcare provider, a destination and the wider support ecosystem. Our responsibility is therefore not only to promote medical excellence, but also to create a patient journey that is safe, seamless, compassionate and culturally sensitive—from the initial enquiry and journey to treatment, recovery and continued care.

As Founding Directors, we extend our sincere appreciation to the Government of Sarawak, our strategic partners, sponsors, exhibitors, speakers, supporting organisations and organising team for their invaluable contributions. Their confidence and commitment have made this event possible.

We hope BGMT 2026 will inspire new ideas, strengthen cross-border relationships and create collaborations that continue well beyond the event.

Welcome to BGMT 2026, and welcome to Sarawak—the gateway to Borneo's medical tourism future.

BGMT 2026 • SARAWAK

Healthcare. Tourism. Partnerships.

One regional platform designed to move Borneo's medical tourism conversation forward.

POSITIONING STATEMENT

BGMT connects the systems around the patient, from policy and clinical care to travel, hospitality and recovery.

The Borneo Global MediTourism Congress & Expo (BGMT) 2026 brings together leaders and organisations working across healthcare, tourism, aviation, investment, technology, accreditation and patient services. The programme combines strategic dialogue with commercial connection, giving participants space to understand the market, exchange practical experience and develop regional partnerships.

WHY BGMT

To connect regional ambition with the partnerships, standards and patient experience required for sustainable medical tourism.

WHAT HAPPENS

Two days of keynotes, plenaries, panel discussions, exhibition discovery, B2B meetings, networking and a hospital site visit.

WHO YOU'LL MEET

Government, hospitals, tourism bodies, airlines, facilitators, investors, technology providers, insurers and regional partners.

Key Clinical Expertise

ONE STOP ORTHOPEDICS CENTER WITH CUTTING EDGE TECHNOLOGY

Providing comprehensive solution for hip, knee, and shoulder replacements, robotic- assisted surgery, sports injury, spine care, complex trauma, limb reconstruction, and pelvic acetabulum fractures, addressing a wide range of orthopedic needs.

NEUROLOGY

Comprehensive care for disorders of the nervous system, including early diagnosis, advanced management, Deep Brain Stimulation (DBS), and rehabilitation for conditions such as Parkinson's disease, movement disorders, stroke, and epilepsy to optimize brain and nerve function. We also offer Transcranial Magnetic Stimulation (TMS), a non-invasive treatment option for selected mental health conditions.

SURGERY

Our hospital provides minimally invasive surgical procedures designed to support faster recovery and smaller scars for a range of surgical needs, including gynaecology, general surgery, and urology.

PAEDIATRICS

Specialized care for children's health, from newborns to adolescents, covering general wellness, immunizations, and management of complex pediatric conditions.

CARDIOLOGY

Advanced cardiac care, encompassing diagnosis, treatment, and management of heart conditions, including hypertension, coronary artery disease, heart failure, and electrophysiology (EP) services for heart rhythm disorders.

ONCOLOGY

Comprehensive cancer care encompassing early detection, diagnosis, treatment and management of various cancers, including chemotherapy, radiotherapy, and targeted therapy for optimal patient outcome

DIGESTIVE HEALTH

Specialization in endoscopy, gastroenterology, and colonoscopy.

ACHS International (ACHSI) is a world-leading healthcare improvement organisation. With over 50 years' experience in the healthcare industry, we are experts in the fields of patient safety, quality, outcomes, and person-centred care improvements.

We are accredited by the International Society for Quality in Healthcare (ISQua) External Evaluation Association for our standards, assessor training program, and organisational management.

Founded in

1974

in Sydney

A team of more than

215

dedicated assessors

More than

1,800

members globally

Members from

25

countries and regions

Our Services

Quality Programs

Improve quality by meeting our IEEA accredited Evaluation & Quality Improvement Program (EQulP) standards through our Foundation, Recognition, or Accreditation programs. Our Centre of Excellence program and higher accreditation levels are available for the most advanced organisations.

Performance & Outcomes

Our Clinical Indicator Program (CIP) is one of the world's largest repositories of clinical data and allows our members to trend outcomes, compare to peer organisations, and internationally benchmark your performance to inform improvement activities.

Global Consulting

Solve your most complex quality and safety issues with the assistance of our global network of experienced healthcare subject matter experts and consultants.

Education & Training

Increase staff competencies and capabilities regarding patient safety and improvement science through our online learning platform and interactive classes delivered by recognised healthcare experts.

We conducted a thorough study which evaluated the different international accreditation systems and found that the Australian program was the one that most addressed the very core of our mission.

- Badr Al Samaa Group, Oman

CENTRE OF EXCELLENCE

Certification for Healthcare Organisations

Endorse Your Accomplishments with a Centre of Excellence Certification from ACHS International

Showcase your hospital or healthcare facility's exceptional clinical program and dedication to patient care.

By achieving this prestigious certification, you demonstrate outstanding compliance with safety standards and a commitment to patient-centred care in any specialty service or centre.

? What is a Centre of Excellence?

A Centre of Excellence is a prestigious recognition awarded to healthcare organisations that have demonstrated exceptional expertise and achievements in a specific specialty or service area.

This certification celebrates hospitals and facilities that go above and beyond in providing top-notch care and outstanding patient experiences.

? What are the benefits?

Distinguish Your Organisation

Stand out as a leader in your specialty and gain recognition for your exceptional services.

Enhanced Reputation

Attract more patients, physicians, and partners.

Increased Patient Trust

Increase patient confidence, loyalty and satisfaction.

Advancement in Quality of Care

Build a culture of continuous improvement.

Competitive Advantage

Be a top choice for patients, doctors, staff, medical tourism and insurance providers.

Do you want to be recognised as a leader in healthcare?

To find out more about how your organisation can become a Centre of Excellence, scan QR code or contact us by emailing info@achsi.org

Key Clinical Expertise

ONE STOP ORTHOPEDICS CENTER WITH CUTTING EDGE TECHNOLOGY

Providing comprehensive solution for hip, knee, and shoulder replacements, robotic- assisted surgery, sports injury, spine care, complex trauma, limb reconstruction, and pelvic acetabulum fractures, addressing a wide range of orthopedic needs.

NEUROLOGY

Comprehensive care for disorders of the nervous system, including early diagnosis, advanced management, Deep Brain Stimulation (DBS), and rehabilitation for conditions such as Parkinson's disease, movement disorders, stroke, and epilepsy to optimize brain and nerve function. We also offer Transcranial Magnetic Stimulation (TMS), a non-invasive treatment option for selected mental health conditions.

SURGERY

Our hospital provides minimally invasive surgical procedures designed to support faster recovery and smaller scars for a range of surgical needs, including gynaecology, general surgery, and urology.

PAEDIATRICS

Specialized care for children's health, from newborns to adolescents, covering general wellness, immunizations, and management of complex pediatric conditions.

CARDIOLOGY

Advanced cardiac care, encompassing diagnosis, treatment, and management of heart conditions, including hypertension, coronary artery disease, heart failure, and electrophysiology (EP) services for heart rhythm disorders.

ONCOLOGY

Comprehensive cancer care encompassing early detection, diagnosis, treatment and management of various cancers, including chemotherapy, radiotherapy, and targeted therapy for optimal patient outcome

DIGESTIVE HEALTH

Specialization in endoscopy, gastroenterology, and colonoscopy.

Healing Meets Hospitality

SCAN ME

A Preferred Destination for Global Healthcare

Medical tourism has evolved into one of the fastest-growing segments of global healthcare, with patients increasingly travelling across borders in search of high-quality treatment, specialised expertise, and better value for care, aligning with Malaysia's Year of Medical Tourism slogan, "Healing Meets Hospitality". Malaysia has steadily emerged as one of the region's most trusted healthcare travel destinations, offering international patients a unique blend of medical excellence and compassionate care. At the centre of this ecosystem is the Malaysia Healthcare Travel Council (MHTC), an agency under the Ministry of Health Malaysia tasked with coordinating and promoting the nation's healthcare travel industry under the unified brand Malaysia Healthcare.

A Smoother Patient Journey from Arrival

Malaysia Healthcare is committed to making every step of the patient journey more convenient and reassuring, beginning from the moment patients arrive in the country. To enhance the arrival experience, MHTC Lounges are available at Kuala Lumpur International Airport (KLIA) and Penang International Airport, offering dedicated support for healthcare travellers. These lounges are designed to provide a more seamless and welcoming experience, helping international patients and their companions feel assisted and at ease upon arrival in Malaysia. This added touchpoint reflects Malaysia Healthcare's commitment to delivering not only medical excellence, but also a patient experience grounded in comfort, care and hospitality.

Strong Growth Reflects Global Confidence

"In 2025, Malaysia's healthcare travel industry achieved a major milestone by recording RM3.35 billion in revenue, marking the first time the sector surpassed the RM3 billion threshold. Significantly, this milestone was reached just two years after the industry crossed its first RM2 billion mark in 2023, demonstrating the rapid expansion of Malaysia Healthcare's global footprint. Throughout 2025, the industry recorded a year-on-year revenue growth of 23 per cent, representing an increase over RM600 million, exceeding the RM480 million growth recorded in 2024. Patient volume also grew substantially, reaching 1.79 million healthcare travellers in 2025, up from 1.59 million in the previous year, a 13 per cent increase. Overall, the industry achieved a compounded annual growth rate of approximately 22 per cent between 2023 and 2025."
